

Javon Thomas

An experienced, energetic, and highly-motivated senior student seeking full-time opportunities that are well matched to my skills, passion, and experience. I hope to increase my knowledge, skill set, and network, and leave a lasting impact wherever I find myself to be.

EXPERIENCE

Google Inc., California — *Software Engineering Intern*

Summer 2021, 2022, 2023

2023 – Integrated a video element into a new, full-stack user information prompt on the YouTube homepage to gain more information on user channel preferences.

2022 – Worked on the common embedder side of the Flutter engine to introduce a highly requested new feature for users to properly propagate a backdrop filter mutation to iOS PlatformViews in their flutter apps.

2021 – Designed and built a user input experience with implemented front-end components for a Google ads tool that helps advertisers gather insights for potential audiences.

Wrote technical design docs for each project that included various sections such as a design overview, a comparison of possible project approaches, and full-stack project implementation details to document the thought process behind each implementation and provide future developers with a better understanding of the features I implemented.

Ten/18 Apparel, Prairie View - *Chief Technical Officer*

03/23 - Present | ten18apparel.com

Responsible for the design and maintenance of the Ten/18 brand website as well as the technical implementation of all brand initiatives, such as online marketing and sales, website analytics, and automation.

PROJECTS

Flutter iOS PlatformView BackdropFilter

github.com/flutter/engine/pull/34355 and [34408](https://github.com/flutter/engine/pull/34408)

Implemented the ability for an iOS PlatformView to be filtered when it is underneath a backdrop filtered widget.

IEEE Prairie View Student Chapter Website

pvuieee.com

Created, designed, and maintained the website for the PVAMU student chapter of IEEE.

Database Creation Project

Generated a functional database following all of the normal form rules and an associated web interface displaying table data from the database using MySQL and phpMyAdmin.
